

Mahmoud Talaat

BIM Architect | Revit | Dynamo | BIM Automation

mahmoud.talaat605@gmail.com | +20 115 674 1997 | Alexandria, Egypt | [LinkedIn](#)

PROFILE

Architecture graduate and ITI graduate with hands-on experience in **Revit**-based BIM modeling and architectural documentation, including parametric families, working drawings, and multidisciplinary project documentation. Developed **Dynamo** workflows and a **C# Revit plugin** to automate practical BIM tasks, with a programming background in C# & .NET that supports **BIM automation** and workflow development.

BIM & AUTOMATION

BIM Modeling & Documentation

- Revit modeling, plans, sections, schedules, details, and working drawings: 3 projects, 35 sheets.
- Parametric family creation and configurable model components.
- Experience working with linked architectural and structural models and multidisciplinary documentation.

Dynamo & Revit Automation

- Developed a **Dynamo** workflow to detect wall-beam intersections from a linked structural model and generate parametric wall openings for unique beams.
- Developed a configurable **Dynamo** workflow for face-hosted family placement, supporting custom types, dimensions, offsets, and row/column exclusions.
- Developed a **C# Revit plugin** that interprets CAD beam lines and labels and places the corresponding Revit beam types.

SELECTED PROJECTS

Boutique Hotel of the Arabian Nights — Design Project (Solo, Alexandria) 2024

Tools: Revit, Rhino, Enscape

- Developed architectural plans and spatial organization around a central open-air courtyard, including guest accommodation, public functions, services, and circulation.

Residential Villa — BIM Modeling & Working Drawings 2022

- Developed architectural plans, sections, schedules, door/window details, finishes documentation, and swimming-pool drawings in **Revit**.

Multipurpose Hall — BIM Modeling & Multidisciplinary Documentation 2022

- Developed architectural and multidisciplinary working drawings covering structural, electrical, HVAC, fire protection, and drainage documentation.

Car Showroom — BIM Modeling & Executive Working Drawings 2023

- Developed executive working drawings for a showroom incorporating steel, glazing, curtain wall, ceiling, and space-frame structural systems.
- Developed the space-frame geometry using **Grasshopper**, connecting computational modeling with the project's architectural/structural documentation.

PROFESSIONAL TRAINING

Information Technology Institute (ITI) — MCIT May 2025 – Nov 2025

Intensive Code Camp — Full Stack Web Development using .NET & Generative AI

TECHNICAL SKILLS

BIM & Architecture — Revit · Dynamo · BIM Modeling · Architectural Documentation · Parametric Families

Architectural Tools — Rhino · Grasshopper · Enscape · Twinmotion

Programming — C# · .NET / ASP.NET Core · Entity Framework Core · SQL Server · REST APIs · Git

Languages — Arabic — Native · English — B2

EDUCATION

Faculty of Fine Arts, Alexandria University 2019 – 2024

B.Sc. Architecture
